

We use superior products. How does this affect you?

We don't "cut corners" with your investment. We will use only the best products on your stone to ensure the highest quality finished product. We take the extra steps other companies miss. For example, once your edge is laminated, or glued together, we re-saw your edge. This cuts off any excess glue left behind and gives you a more seamless, finished edge.

We are licensed, bonded and insured. How does this affect you?

You can rest assured knowing we have taken all the steps necessary to keep you, the property owner, safe. During the licensing process we have had FBI background checks and fingerprinting done. Be sure you can trust the professional coming into your home or business. Our business is fully insured. If someone should sustain an injury while on your property, you can have peace of mind knowing we have already protected you and our employees.
